

HR v1.7.21 Update Report

Backend

- Initial Run auto-starts with zero baseline (fix 409 baseline_missing)
- Fix POST /reports/daily/import 422 (date parse)
- Fix POST /query 500 (missing exception catch)
- Add original_filename to RunSource model
- Add DELETE /runs/{id}/decisions/{id} undo endpoint

Frontend

- Decision button disable-reason tooltip
- Baseline Import panel moved above review section
- Batch confirm-all button for decisions
- Drag-and-drop file upload on source slots
- Preserve UI state after upload (shallow merge)
- Global Toast error notification component
- RunStepper progress bar
- Weekly publish button reason tooltip
- ComputeLog: dispatchEvent -> React Router navigate
- Sidebar highlight fix, calendar label unification, filename display

Cleanup

- Removed 7 legacy components + Workbench page
- Cleaned services/index.js (3 unused exports)

Database

- run_sources: ADD COLUMN original_filename VARCHAR(255)

Verification

- Backend API: 14/14 tests passed
- Frontend build: 415KB JS + 44KB CSS
- Full chain: Create->Upload->Decide->Preview->Publish OK
- Deployed on Windows Server 172.17.60.102:8080
